**PRODUCT OVERVIEW**

Our Roller Deck scale is ideal for weighing cargo and can be used by freight companies, airports, as well as many other industrial applications. It can easily be integrated into an existing assembly line to weigh cargo to increase productivity. The roller deck makes it effortless to move cargo down an line while weighing it. The RDC is available in a 58” x 54” standard dimension scale with capacities range from 1,000 to 2,000 lb with an accuracy as low as 0.2 lbs. Every Roller Deck Scale includes features like 200% overload protection, industrial load cells, and digital indicator. Our heavy-duty industrial design is built to last. Along with our T900 indicator this scale is easy to operate and has a one second response time. It provides high accuracy and repeatability under continuous heavy industrial usage. Our scales can come in any custom size, shape or capacity to meet your needs.

**FEATURES**

- Complete scale system
- Can be easily integrated into an existing assembly like to increase productivity
- Includes T900 NTEP indicator
- 200% overload protection
- 0.2 lb accuracy
- 4 NTEP alloy steel load cells
- 18 stainless steel roller tubes to smoothly glide product across
- Powder coated frame
- 1” LED or LCD display with backlight
- Gross/Tare/Pre-Set Tare/Zero
- Multiple Hold functions
- Count and Accumulation weighing
- Overload / Underload alarm
- Operates on 110V AC adapter (included)
